

Lucy Wittenberg is a self taught artist, always following the path of creative play and imaginative self expression. Paving a greener path with her kind and conscious glass work for over five years. Wittenberg creates original, one of a kind, sustainable glass art for your home and garden. Each piece is inspired by Wittenberg's love of nature and the beauty that surrounds her. Wittenberg uses glass cut offs, mosaic tiles, found objects and her two hands to create unique designs. Throughout the creative process Wittenberg is careful to keep her focus not only on the aesthetic of the final piece but her passion to recycle, reduce and reuse both glass and frames keeping them from ending up in our landfills.

"Together through this creative journey we can pave a greener tomorrow with one recycled art piece at a time." - Lucy Wittenberg
